Takao Miyasaka

Message from the president

The Suwa area mainly consists of six cities ; There are many small companies which have unique processing technologies such as cutting, pressing, electronics and molding.

As these unique companies work together, they can produce not only superior technique but a higher added values.

As our industrial surroundings have been rapidly changing, we will work together with the government, economic organizations and a support group for many issues that can not be solved by one company alone.

From "the eastern Swiss", to coin a phrase, to creating Suwa brand, we will try to pass our technology on to the next generations, and try to encourage all industries to be active.

Please get in touch with us at SUWAMO for pursuit of ensuring steady our business growth.

Business development

Promote partnership, give information and cultivate a new clientele through networks, new products and technological evaluation. This support is to contribute to public industries through business activities, exhibitions and human resource development, it will also provide information from the government. Please join our activities and cooperate for local industries.

Creating robust manufacturing regions with collective strength Sharing values on Monozukuri, or manufacturing

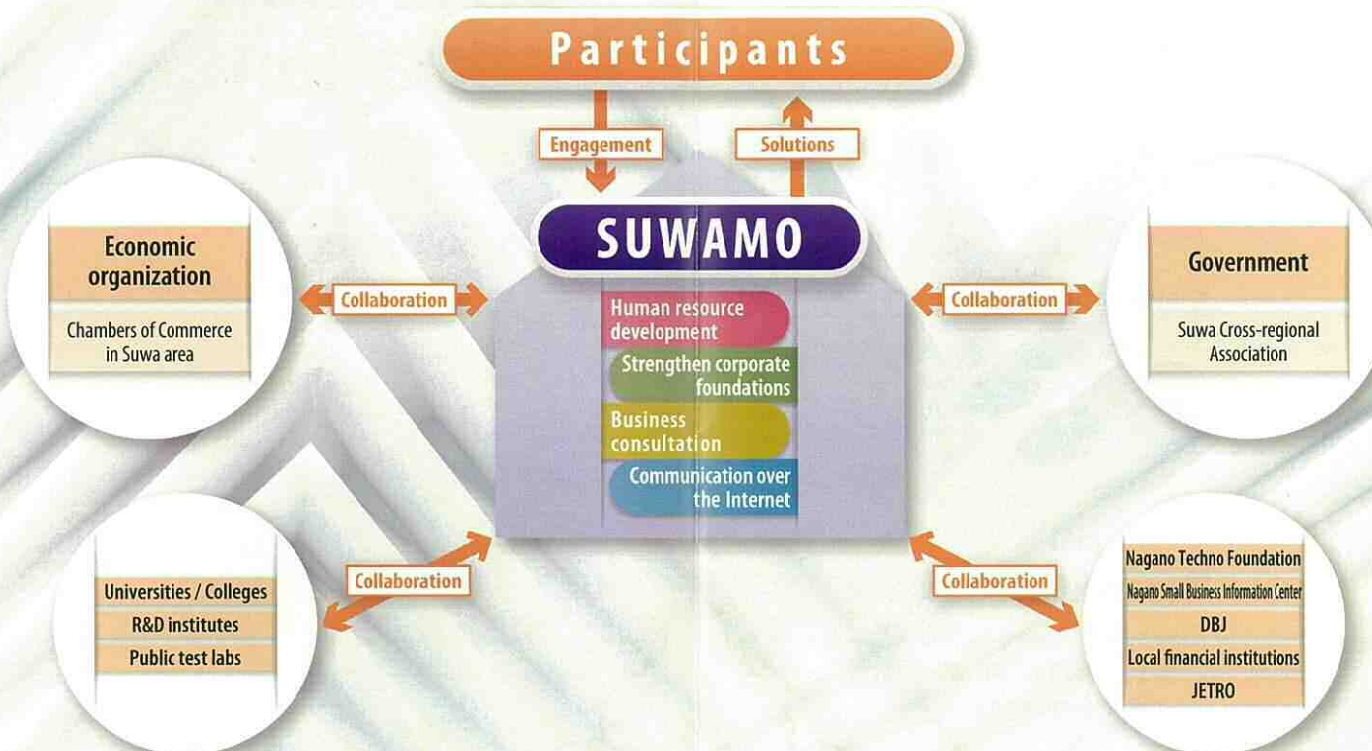

Benefits from focusing on business

Providing new business opportunity

Supporting business incubation

Offering one-stop-shop solutions

Developing human resources

Human resource development

By building up our technique over many years, we are able to foster human resources and nurture the next generations about new technologies, we will hold a seminar for new fields to help stimulate unique competencies regarding new knowledge.

Strengthen corporate foundations

As international companies have been intensifying deregulation and globalization, our surroundings have been dramatically changing. For companies sustainably producing valuable goods, we stay close to them so that they can draw their strength in the wake of acquiring new concept and competence.

Business consultation

SUWAMO is fully utilizing expertise given by its advisers from sales and technical aspects for enabling participants to secure new business opportunities and expand their existing businesses.

Communication over the Internet

It is indispensable for us to share and keep an eye on valuable information such as social needs, market trends, up-to-date technologies and finance. We will help participants gain competitive advantages through utilizing websites and e-mails.
